SysTools PST Finder is a reliable program designed to help you retrieve all the .PST files stored on local disks, removable drives, in Recycle Bin or in the local Exchange server. The application is easy to use and only requires that you select the desired location in which to search. The files are retrieved with their full path. Find .PST files on your computer. The .PST format defines a specific file used for offline storage of Microsoft Outlook data, such as

emails, contacts, calendars, notes, folders and many more. The files can store not only the information, but also its structure, which makes them suitable for offline transfer and data backup. SysTools PST Finder allows you to identify Outlook storage files, on your computer, which is particularly useful in cases when you do not know where the files are saved. Often times it happens that you save such files with irrelevant names or in backup folders with long path names. Scanning local drives and remote locations

SysTools PST Finder can scan the selected drives: local disks, removable memory devices or on the local file server. It can perform a thorough, recursive scan of the selected location, then return the list of files, along with their sizes and full path. This way, you may easily find the file you are searching for, then access the indicated path and retrieve the PST document. The application does not allow you to directly open the files, from the table display, especially those located in Recycle Bin. However,

you may copy the entries to clipboard or export them to CSV files. Start or pause the process at any time SysTools PST Finder can generally identify the files you seek, in a short time, however, when the scanning process is extended to several locations, its duration might increase. A progress bar indicates the evolution of the search, which you can pause or restore at any time. Additionally, the information bar at the bottom of the window indicates the program's current status. SysTools PST Finder

Features: Easy to use Only one mouse click is required for file scanning Scanning local drives and remote locations Allows searching Outlook databases Allows easy file selection for further extraction of the file Scanning process is customizable Efficient scanning without interruptions Can search all drives Automatic or scheduled searches Selective or detailed searches The application supports the following file types Outlook databases Outlook.pst

Barack Obama is draping himself in the mantle of 'listening

president' to get the attention of the American public following the terror attacks in Paris that killed 132 people. A study done by Leger Marketing in late June showed that 68 per cent of the American public was directly affected by the most recent attacks. That puts them in the top 10 per cent of the most affected demographic group. Many polls also show a majority of Americans don't believe the President deserves the title of 'listening president' because he failed to stand up to groups of hate. A recent Gallup Poll found that

54 per cent of Americans believe the US President does not deserve the title of 'listening president' because he failed to stand up to Muslim groups. Only 39 per cent of Americans felt he deserved the title. Many of those polled took issue with Mr Obama's comments made after the terror attacks. He said he would stand shoulder
