Photoshop's 3D features will be removed in future updates. Users working with 3D are encouraged to explore Adobe's new Substance 3D collection, which represents the next generation of 3D tools from Adobe. Additional details on the discontinuation of Photoshop's 3D features can be found here: **Photoshop 3D Common questions on discontinued 3D features**. It's also a strict policy that Adobe software is broken for users who use alternative operating systems or browsers. By that, I mean that all of Frank's testing indicates that Adobe software works well on Windows, Mac or Chrome, but doesn't meet Covid-19 standards when using any other browser or operating system. This is very limited to any web browsers that don't conform to W3C standards, which means that it includes Opera, Safari, Edge, Chrome, Brave, and Firefox, but not other browsers. For example, users on Microsoft Windows with Internet Explorer 11 are not supported, along with Safari on Mac OS X. However, there is good news for iPad 1 users, there is an iPad 1 version of Photoshop for Web. That means that you can either print the screen shots below to use with your iPad 1 or use the image of the screen shot below on your screen instead, depending on which version of Photoshop you have installed. Either way, check out the picture of the iPad 1 screen shot I took!
