Since clarity of your pictures is assured to be the best quality, the lens of the professional XTREME 2 aims for maximum resolution, up to 72MP! There are however a few other selling points. The lens is interchangeable with the standard Leica 2 lenses, the lens is focusing as quick as 90times a second and has a dust and moisture resistant construction. Furthermore, it is possible to increase the resolution of the digital sensor by using a wide angle adapter. For more detailed information, please visit the Nikons own text. The plus is, of course, the complete X-Tensor construction. This ensures a maximum protection for your camera. Because the XTREME 2 is an DSLR, it is possible to operate it from heights. A rubber elbow protects from high temperatures and dust and a battery cover secures the batteries. The focussing, shutter, aperture rings and exposure compensation wheel are located on the top of the camera, and the film advance and wind out lever on the left side. The small form factor of the XTREME 2 just feels optimal. The focussing system of the XTREME 2 is quite the beast. It is the same focussing system that is used in many professional Sony cameras. The focusing in the XTREME 2 is quick, and even in the extreme settings, it is impossible to decelerate it. Furthermore, it is possible to assign a "button" to a focus speed. Because of the focussing system, it is possible to use the camera with flash or continuous shooting, while no red-eye effect appears.
